

1. Hypothesis: our group strongly believes that most kindergarten children like Santa Claus the most. we think that because you get lots of presents and you may even receive money and chocolate for Christmas.

2. How we Found our Data:

we surveyed 77 Kindergartens (3 classes).
Two of the Classes results got sent to us by email and the last class, we surveyed ourselves.

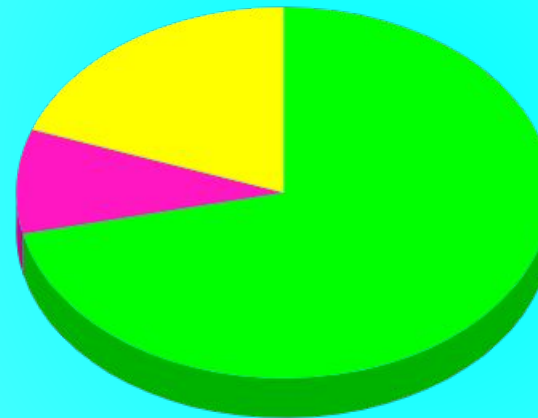

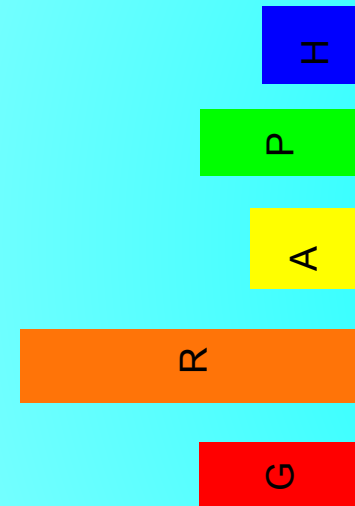

3. The Results were:

Santa claus 55
Easter Bunny 15
Tooth Fairy 7

SANTA, TOOTH FAIRY AND THE EASTER BUNNY...

4. Financially, having Santa as the most popular puts a lot of weight on the parents shoulders. They have to spend a lot of money buying presents and food for the special day. Christmas would be the biggest financial dent.

KINDERGARTENS DECIDE...

- Santa
- Tooth Fairy
- Easter Bunny

5. Problems we had while surveying...

1 Most of the Kindergartens voted more than once so we had to do it again.

2. They were moving too much so we couldn't see clearly who wanted to vote for what.

6. In Conclusion, our hypothesis was correct. Santa was the most popular by 55 votes. Although for some children it was not an easy decision as they liked each one equally.
